DISTRICT 33

District 33 consists of only one school, the Louis Armstrong Intermediate School 227.

I.S. 227 was opened in September 1979 as an innovative middle school under the direct supervision of the Chancellor.

The school draws students from the entire Borough of Queens. Its programs are augmented by the participation of the Queens College School of Education in teacher training, curriculum and methodology.

SOME NOTES ON SPECIAL EDUCATION

The Division of Special Education (DSE) is responsible for the provision of educational programs and services for those students certified as handicapped by a Committee on the Handicapped and/or the School Based Support Team in accordance with regulations set forth by a New York State Commissioner of Education. Programs concentrate on providing services in the development of educational, social, vocational, and academic competence.

Programs and services for students in need of special education are divided into three areas: Regional, Citywide, and Itinerant.

Recommendation for and placement in Special Education is done by a district subcommittee on the Handicapped (COH). Pupils who are referred to COH receive a multi-disciplinary diagnostic evaluation and review. The COH and the pupil's parent(s) discuss the results of the evaluation and the proposed program placement in order to develop an Individualized Educational Plan for that pupil to meet both short and long range educational goals.

Special Education pupils in general education schools are shown within the Ethnic Composition section in the PROFILES under the caption "Special Grades", and also under "District 75". District 75 is the Board's designation for those schools and centers administered solely by the Division of Special Education.

The SCHOOL PROFILES include District 75 schools. Because these special education facilities feature small classes, their pupil-teacher ratio is lower and their costs per pupil are higher than those of general education schools.

The District 75 Special Schools appear in the following order in the PROFILES:

SCHOOL FOR THE DEAF
SCHOOL FOR LANGUAGE AND HEARING IMPAIRED CHILDREN
HOSPITAL SCHOOLS
OCCUPATIONAL TRAINING CENTERS
DAY SCHOOLS FOR THE EDUCATION OF THE EMOTIONALLY HANDICAPPED
INSTITUTIONS FOR THE EMOTIONALLY HANDICAPPED
SCHOOLS FOR CHILDREN WITH MULTIPLE HANDICAPPING CONDITIONS
SCHOOLS FOR CAREER DEVELOPMENT
OTHER SPECIAL EDUCATION CENTERS

A brief description of each follows.

The School for the Deaf at JHS 47, Manhattan, offers a comprehensive program for the deaf from nursery through junior high school grades. This program is designed to meet the needs of students whose hearing disability makes education in a regular classroom inappropriate. All regular school subjects are taught.

The School for Language and Hearing Impaired Children provides for the education of students with language impairments at centers in general education schools in all boroughs. Language impairment is the inability to understand or use spoken language.

The Hospital Schools consist of classes from kindergarten through high school in hospitals or convalescent homes for students with physical and medical problems. The primary function of these schools is to maintain continuity of education until students return to a regular school.

Occupational Training Centers are for mentally retarded young adults, ages 17 through 21. The centers provide concentrated training in social and occupational skills to prepare students to function in the adult world to their maximum capacities. Students are prepared for employment through activities which approximate the conditions and situations existing in the world of work.

Day Schools for the Education of the Emotionally Handicapped provide a temporary learning environment in a public school setting for students who are unable to be sustained in mainstream settings.

Institutions for the Emotionally Handicapped include a variety of programs that are conducted collaboratively between the Board of Education and an agency (i.e. Psychiatric Hospital, Social Service Agency, religious organization). They include both residential and day treatment facilities. These programs provide the necessary intensive educational programs to students requiring both clinical and rehabilitative services.

Schools for Children with Multiple Handicapping Conditions provide multi-disciplinary approaches to the education of students with more than one disability. In these centers, intensive educational, remedial, and habilitative services provide an optimal program for each student. The students vary greatly in intelligence and have multiple handicaps which may include neurological, physical, language, hearing and vision impairments.

The Career Education schools serve pupils from 14 to 21 years of age with learning disorders and neurological problems and require a structured learning environment infused with language, motor, academic and occupational instruction.

In addition to the Special Schools described above, there are other Special Education Centers which include programs for the Multiple Handicapped, and Readiness programs for young students with severe learning disabilities. For further information about all programs, please contact the Division of Special Education at 110 Livingston Street, Brooklyn, NY 11201.

SOME NOTES ON THE HIGH SCHOOL PROFILES

Academic/Comprehensive high schools provide a broad range of educational opportunities for students who are preparing for college or careers upon graduation. Various programs exist ranging from the traditional to the more innovative with curricula ranging from the technical to the humanistic. Students can select courses from a wide variety of elective offerings within many departments and/or special programs. This serves to meet students' individual needs and abilities. Academic/Comprehensive high schools make provision for the entire range of students, from the gifted to those requiring remediation.

Vocational/Technical high schools provide both an academic education and training in approximately 70 skilled trades and professions. Courses are available which prepare students for entrance into the world of work upon graduation. Other programs geared to prepare students for higher education and training beyond high school are also available.

Independent/Alternative high schools and Special Programs operate as small units independent of the large conventional high schools. These schools offer a special service to a limited number of students who benefit from a smaller setting and innovative pupil activities. Most of the curricula emphasize acquisition of skills in reading, mathematics, and the basic high school subjects. Offsite experiential learning is a component of most programs. While most students prepare to earn the High School Diploma, some prepare to qualify for the New York State High School Equivalency Diploma.

Resources are distributed to all high schools according to the same allocation formula; however, some per capita variations exist due to the following:

Size of School - Small schools (e.g. Alexander Hamilton, South Bronx) and new schools with less than their full projected organizations (e.g. A. Philip Randolph) may have a higher per capita cost than larger schools because their support services (principal, assistant principals, school secretaries, stockman, etc.) are being apportioned among a smaller number of students. In the case of annexes, the duplication of overhead costs raises the per capita costs of the total school organization.

Average Number of Subjects - An effort is made, in accordance with Board of Education policy, to provide seven periods of instruction for each pupil. However, variations may exist in the number of subject periods taken by students. These variations are often related to employment, course concentrations, and special needs. The average number of subjects carried by pupils in high schools in 1981-82 was 6.95 for academic/comprehensive high schools, 7.46 for vocational/technical high schools and 7.01 for all high schools combined. Schools which have a lower curriculum index may have a lower per capita cost.

Subject Area Distribution of Classes - The proportion of pupil periods of instruction in various subject areas affects per capita costs. Contractual class size maximums and safety considerations require different staffing allocations. This contributes significantly to higher per capita costs in schools where trade shops are concentrated (vocational and comprehensive high schools) because they have a maximum class size of 28. In contrast, regular education classes can be organized with greater maximum class size (34 in regular classes, 50 in physical education and minor music).

Longevity - The cost data for individual schools is affected by staff longevity. Although High School Division resources are allocated to schools on a staff unit basis (average salary of a teacher), costs reflect actual expenditures. Teacher salary rates differ from school to school. Thus schools with higher average teacher salary rates generally have higher per capita costs.

The 1981-82 school year marks the ninth year of unit allocations to the high schools. This method of allocation provides tax levy personal service allotments in staff units rather than in specific positions and responds to suggestions made by the Citizens Budget Commission for a more effective use of pedagogic resources.

All tax levy personnel service funds available for direct allocation to schools are equated to staff units. A staff unit is equivalent to an average teacher's salary and is given an index of 1.0.

Average budgeted salaries also are developed for all pedagogic and administrative personnel. These average salaries are given an index value in relation to the 1.0 for teachers. Positions, such as school secretary, which have average salaries less than those of a teacher, are indexed below 1.0. Positions, such as guidance counselor, which have average salaries higher than those of teachers, are indexed above 1.0. Schools receive their allocation in units and then convert these units into various positions.

Under the unit allocation procedure, principals are encouraged to convert units into positions appropriate to the tasks to be performed. Principals receive a list giving titles and weighted unit values of various professional, paraprofessional, and civil service positions.

The allocation formulas described below refer only to funds derived from tax levy sources. Additional allotments are provided through reimbursable programs financed through state and federal funds and special education funds.

DESCRIPTION OF FORMULAS

The formula for distributing units to regular high schools is in six parts:

1. BASIC SUPPORT SERVICES

This segment of the formula provides a constant 20 units for minimum services common to all high schools regardless of size. In addition, eight

1234

(8) units per 1000 pupils or fraction thereof for registers in excess of 1000 to a maximum of 55 are provided for additional support services needed in larger regular high schools.

There is an additional basic support component in the formula (.008 per pupil) for the Special Education register.

2. INSTRUCTION AND SUPERVISION

This segment provides the teacher time for instruction as well as supervision. It combines the factors for register, average number of subjects per day per pupil, contractual class size maximums, average class size and supervision of instruction.

a. The factor, 1.05, provides for assistant principals (supervision) and is based on experiential data.
b. The estimated register is the adjusted register estimated for the budget date (October 31 or March 31).
c. The weighted daily pupil load is the estimate of the daily average number of subjects elected by pupils for programming, weighted for contractual class size maximum. Each principal's original estimate is reviewed and, if necessary, adjusted according to experience. The formula provides that no schools receive allocation based on a curriculum index less than 6.00. Also the school maximum allocation curriculum index has been raised to 7.25; however, principals may schedule more than 7.25 instructional subjects for each pupil. The weighting is based on the normal contractual maximum average class size of 34 and is computed as follows:

Maximum Class Size	Subject Area	Computation of Weighting Used	Weighted Load Factor (See Note)
50	Physical Ed.	34 ÷ 50 = 0.68	0.68A
50	Minor Music	34 ÷ 50 = 0.68	0.68B
28	Trade Shops & Practical Arts	34 ÷ 28 = 1.22	1.22C
34	All Other Subjects	34 ÷ 34 = 1.00	1.00D

Weighted Load Factor = 0.68A + 0.68B + 1.22C + 1.00D

Note: The AVERAGE NUMBER of subjects per day per pupil for each subject area must be substituted for the letters A, B, C, and D.

d. The Factor of 31.5 is used for the average class size.

e. The average class size is multiplied by 5 to weight it for a normal 5 period day teaching load.

3. SPECIAL NEEDS - PUPILS WITH SPECIAL EDUCATIONAL NEEDS

A. PSEN REPLACEMENT SUPPORT
This allocation replaces the former PSEN additive units provided for remedial efforts (remedial reading, remedial mathematics and remedial reading and mathematics through bilingual methodology).

B. LANGUAGE HANDICAP PROGRAM
This formula generates staff units for bilingual programs in accordance with the Consent Decree. Units are allotted on a weighted per capita basis.

C. HOLDING POWER PROGRAM
This allocation is a limited allotment distributed by the recommendation of area superintendents to some schools based upon their reading scores and drop-out rates.

4. SPECIAL EDUCATION NEEDS

In addition to allocations provided to high schools by the Division of Special Education, the High School Division provides allocations for:

A. Basic Support - Each school is funded at a rate of $100 per special education pupil to pay for supportive services funded for Special Education pupils.

B. Program Impact - Each school is provided with a per capita rate of funding to help defray the cost incurred by high schools as a result of conducting mainstreamed and/or integrated programs for Special Education pupils.

5. DISCRETE ALLOTMENTS FOR ONGOING & INNOVATIVE PROGRAMS

This segment provides for the allocations of staff units for ongoing and innovative programs to specific high schools in consonance with the educational judgments of the high school principals and the high school superintendents and executive director. These programs include mini-schools, special courses, unique services, miscellaneous needs such as Co-op Programs Coordination, Machinist Helpers, UFT District Representatives, Annex Supplements, Extended Day Supplements, etc.

6. This year for the first time schools are given budget for school aides and non-athletic extracurricular activities which previously were budgeted for centrally. As a result, schools have to budget for all school aide hours and non-athletic activities they intend to use.

The formula used to fund Independent Alternative High Schools is based upon one (1) staff unit for each sixteen (16) pupils.
